ABOUT US

Welcome to the world of Fabe Polska - your partner in building the future!

We act with determination and passion, and implement the most demanding projects. We specialize in the comprehensive construction and modernization of provincial, national and express roads, creating safe and efficient infrastructure elements for local communities and the country's economy.

However, this is only the foundation of our business. Fabe Polska is not just roads - it's a comprehensive offer, which also includes the construction of civil engineering structures, construction works related to the erection of buildings, and the execution of specialist works. We are constantly expanding our activities and portfolio, providing our clients with comprehensive services at every stage of the project.

Thanks to our commitment, flexibility and high quality of services, we have earned the trust of reputable clients, including such giants as the General Directorate of National Roads and Motorways (GDDKiA), Mazovian Voivodeship Roads Authority (MZDW) in Warsaw, Świętokrzyskie Voivodeship Roads Authority (ŚZDW), Miechowski County and the Maritime Office (UM) in Gdynia. Our pride is not only the execution of projects, but also their completion always on time.

But our mission is not only to build infrastructure - it is also to invest in the future by developing young talents. At Fabe Polska, we believe that the young generation is the future of our industry, so we are committed to its development in order to build a better world with us.

SCOPE OF ACTIVITY

Construction of roads

It is a multi-stage process that includes designing of route, preparation of site, construction of substructure and laying of pavement. It requires consideration of factors such as traffic, safety and aesthetics of surroundings.

Construction of bridges

It's a precision engineering challenge that includes construction, analysis of ground conditions, designing of foundations and laying of pavement.

Hydraulic engineering

It requires hydrological analysis, structural design and execution of construction works in a very specific and challenging environment.

Construction of tracks

It is crucial to understand the needs of rail and tram traffic and to ensure the safety and durability of the infrastructure.

SUMMARY OF ACTIVITIES

Thanks to our wide range of services, we are able to perform any type of construction works, managing them with a high level of planning and organizational skills.

STRUCTURE OF THE COMPANY

Fabe Polska 2025

PROJECT PIPELINE

AMBITIONS BEYOND THE SHORT-TERM

Fabe has a solid pipeline of active ongoing project, and continuously look for local opportunities of expansions. As of 30/04/2025:

8 Active Projects

9 Tenders

Summary*

2025

Active Portfolio Value (in PLN – gross)

over 3.000.000.000

Active Tenders Value (in PLN – gross)

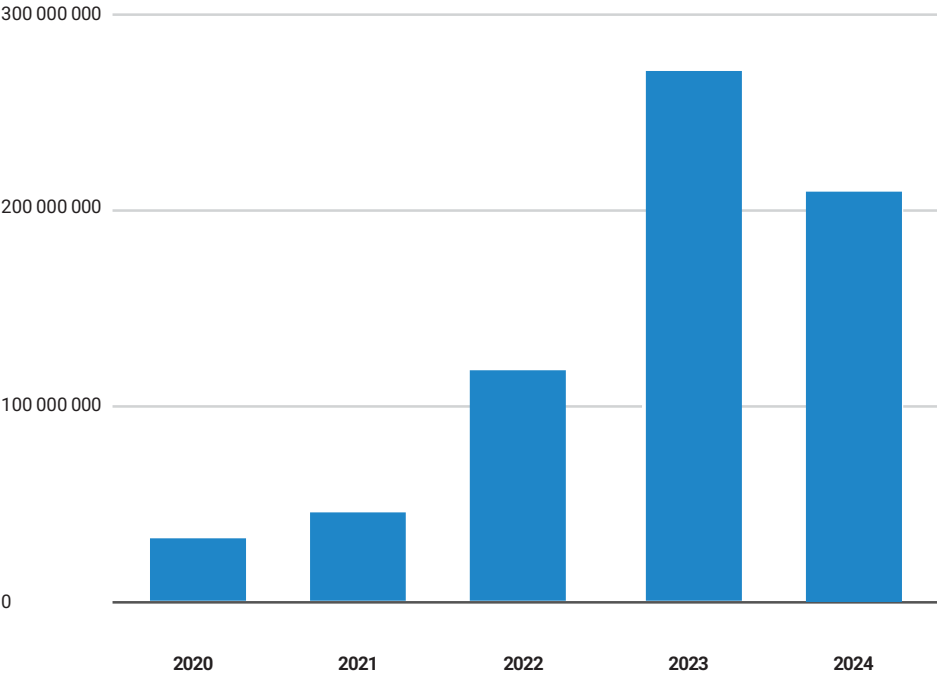

over 9.500.000.000

*Aggregate active portfolio value, including consortium participants shares

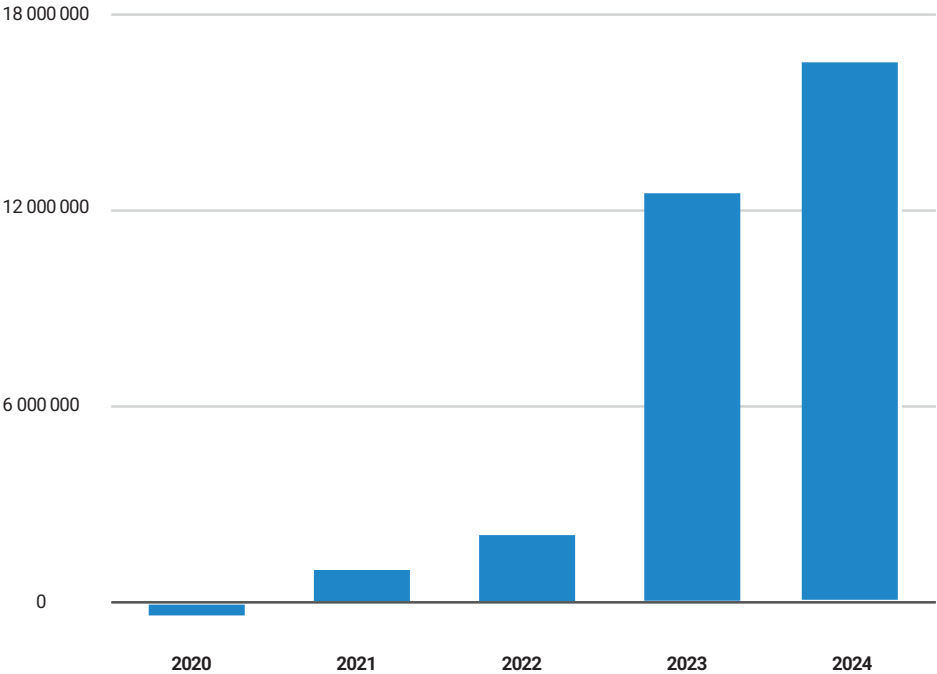

RESULTS

Revenue of Fabe Polska in 2020-2024

Fabe Polska 2025

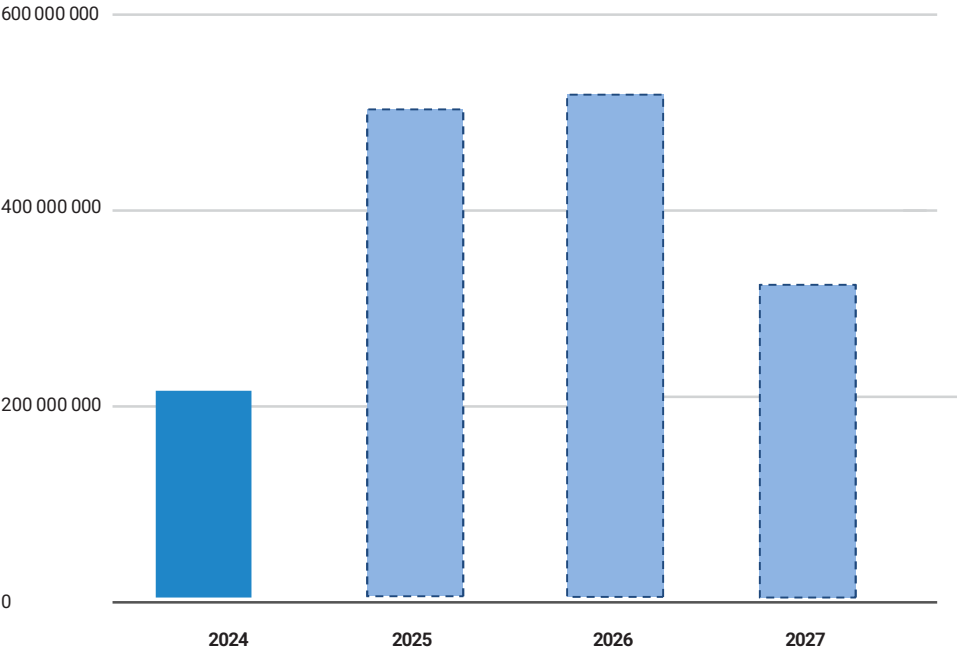

Net Profit of Fabe Polska in 2020-2024

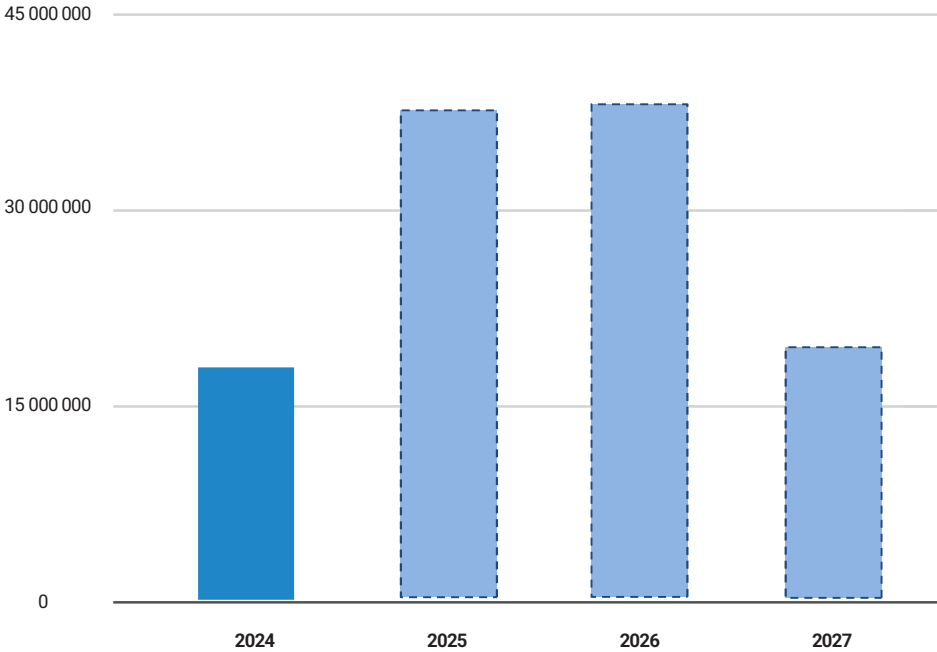

PROJECTED RESULTS*

Revenue of Fabe Polska in 2024-2027

Net Profit of Fabe Polska in 2024-2027

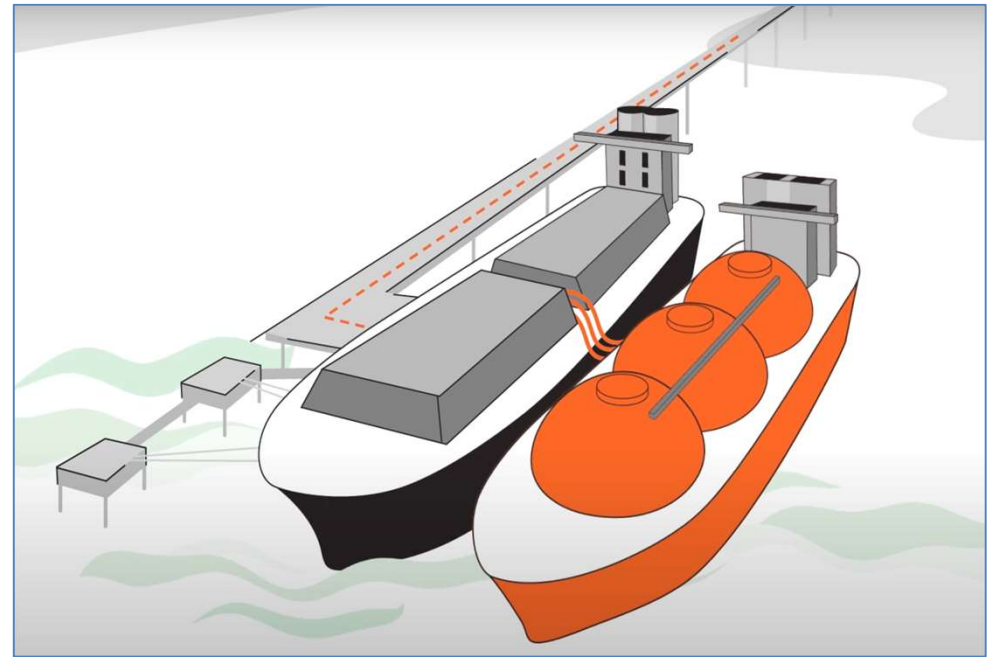

Fabe Polska 2025

* Based on active projects as of 30/04/2025. No potential revenue included.

FSRU - Floating Storage & Regasification Unit

Fabe is going to be a key contributor to Poland's energy infrastructure resilience, through the execution of works of the first FSRU project in the country.

Pictures from GAZ-SYSTEM S.A.

The consortium of companies with Fabe has been awarded in a tender participated by the biggest construction companies in Poland. This is a testament to the Company's technical know-how and ability to leverage a global network of skilled partners.

QUALITY CERTIFICATES

PN-EN ISO 9001:2015

is an international standard that defines the requirements to be met by an organization's quality management system. This standard is widely known and accepted around the world. Our ISO 9001:2015 certificate is confirmation that our procedures, processes and practices are fully compliant with the highest quality standards. With this certificate, we can assure our customers that Fabe Polska operates on the basis of proven and effective quality management systems, which translates into a high standard of our services.

PN-EN ISO 14001:2015

is an essential standard for environmental management systems. It operates on the basis of international criteria and is a confirmation of the consistent implementation of all elements aimed at reducing the organization's negative impact on the environment as much as possible. With ISO 14001:2015 certificate, we confirm our commitment to environmentally friendly practices.

PN-ISO 45001:2018

is an international standard for safety and occupational health and safety (i.e., occupational hygiene) management. ISO 45001-2018 certificate is a confirmation that we protect the health and lives of our employees and ensure that the projects we undertake are carried out in a safe manner for all road users.
